

MoonVeggies

Buying out territories on the Moon to plant vegetables

Step1

- Scout for free land on the Moon that we can buy to plant our MoonVeggies.
- Buy out all of the free land that is plantable (inhabitable by plants).
- Budget: 500b €; Time: 30 days; Recourses: 1 negotiator, 1 lawyer;

Step2

- Cultivating the land/soil to prepare to plant the vegetables.
- Budget: 200b €; Time: 60 days; Recourses: 20 tractors and 20 astronaut tractor drivers;

Step3

- Build a hothouse. With special tanks that contain CO2 and O2.
- Budget: 200b €; Time: 120 days; Recourses: 100 workers;

Step4

- Build special watering system.
- Budget: 200b €; Time: 120 days; Recourses: 100 workers;

Step5

- Fertilize the land.
- Budget: 200b €; Time: 30 days; Recourses: 20 tractors and 20 astronaut tractor driver and 50 workers;

Step6

- Plant the vegetables. Tomatoes, cucumbers, lettuce, cabbages, potatoes.
- Potatoes will be our best option, it's easier to grow them.
- WATCH the movie **THE MARTIAN**
- Budget: 200b €; Time: 60 days; Recourses: 200 workers;

Step7

- Harvest and bring the vegetables back to Earth.
- Budget: 200b €; Time: 60 days; Recourses: 200 workers and cargo spaceship;
